

Chain lubrication oil

Doris PILAK

Chain lubrication oil

Doris PILAK

An oil based on deeply refined mineral oil and a special combination of refining additives, which includes:

- viscosity-depressing additive,
- adhesive-improving additive for oil to metal.

Application:

The oil is intended for lubricating the cutting system and guides of mechanical saws used in forestry, orcharding, etc.

The properties of the oil:

- excellent adhesion to moving parts of the device (saw cutting system),
- excellent lubricating properties,
- protection against corrosion and abrasive wear.
