

# Extraction gasoline (extraction solvent)

**Cleaning an old vise:**

**Extraction gasoline** - a product used for thinning fats, oils, and waxes, degreasing surfaces before painting. It is also intended for cleaning tools and persistent stains.

Greatly improves the flow of oil-based, phthalic, and phthalocyanine paints and varnishes.

Extremely efficient product.

**Also used for cleaning and degreasing:**

- steel and aluminum surfaces,
- galvanized and stainless steel,
- old paint coatings,
- plastic materials,
- primers,
- polyester putties.
