

Hydraulic oils HL

Hydraulic oil Doris

DORIS hydraulic oil is a mineral-based product with a high viscosity index ranging from 130 to 155, containing zinc-free anti-wear additives.

The hydraulic oil is designed for particularly demanding hydraulic systems that require a high level of lubrication and good filterability. DORIS hydraulic oil performs well in all weather conditions and throughout the year.

The properties of the oil:

- resistant to oxidation,
- provides corrosion protection,
- ensures adequate lubrication,
- exhibits resistance to high temperatures,
- is easily filterable,
- has the ability to effectively release air.
