

Hydraulic oils HV

The properties of the oil:

- resistant to oxidation,
- protects against corrosion,
- provides adequate lubrication,
- has resistance to high temperatures,
- easily filterable,
- has the ability for effective air release.

Standards and specifications:

PN-EN ISO 6743-4

PN-ISO 3448 VG: 46

PN-ISO 1158 HV

DIN 51 524 cz.3 HVLP

Hydraulic oil HV

It's designed to operate in challenging and very challenging conditions, such as high pressures and varying temperatures. It's characterized by a high viscosity index. The appropriate level of anti-wear properties, excellent filterability, and high stability ensure optimal operation. Excellent for use in diverse atmospheric conditions.
